### 18. How can I view the ghost view output?

The viewing of Postscript file in desktop PC requires two software components, the Ghostscript and GSview. To complete the installation successfully, first install the Ghostscript then the GSview. Most updated version of programs can be downloaded from <a href="http://www.cs.wisc.edu/~ghost/index.htm">http://www.cs.wisc.edu/~ghost/index.htm</a> (get the one for 32 bits and Windows 95, 98, ME, NT, 2000 or XP). The versions of programs used in following procedure are just for reference.

#### Ghostscript

Run the downloaded Ghostscript file gs650w32.exe

### Click "Setup"

AFPL Ghostscript 6.50 for Win32	×	
This installs AFPL Ghostscript 6.50. AFPL Ghostscript displays, prints and converts PostScript and PDF files.
